'Ridaura' should be added to a comprehensive baseline program that includes NSAID therapy. CBC with differential, platelet count, urinalysis, and renal and liver function tests should be performed prior to 'Ridaura' therapy to establish a baseline and to identify any preexisting conditions. CBC with differential, platelet count and urinalysis should then be monitored at least monthly; other parameters should be monitored as appropriate.

Please see complete prescribing information, paying particular attention to the boxed warning. You will receive further detailed information about 'Ridaura' shortly. In the meantime, your SK&F Representative or the SK&F Medical Department (1-800-523-4835, extension 6344/5231) will be happy to answer any questions you may have.

Sincerely,

Karen Putterman

Karen Putterman, M.D.
